

Introducing the next-generation RingCentral Office®

Get more work done with less effort.

Communicate, collaborate, and connect better—anytime, anywhere

Welcome to the next frontier of business communications for today's modern workforce. The next-generation RingCentral Office is an entirely reimagined user experience that changes the way people communicate, share content, and manage projects—all with the goal of getting more work done with less effort.

Built for the way we work today

Intuitive user interface everywhere

Simple and elegant with a consistent user experience across mobile, tablets, and laptops.

Unified experience in a single view

Voice, video, messaging, tasks, file sharing, conferencing, fax, SMS—all at your fingertips.

Streamlined workflows

Easily transition between voice, messaging, and video conversations while simultaneously sharing files, managing tasks, projects, calendars, and more.

Enterprise-class

Robust administrative controls, security, reliability, scalability, compliance with message logging requirements, as well as a HIPAA-compliant conduit to meet the requirements of the largest organizations.

Team messaging and collaboration APIs

Open APIs and SDKs for embedding messaging, collaboration, and task automation functionality into their business workflows and applications.

Chatbots and AI support

Off-the-shelf integrations and chatbot frameworks, including Hubot, Lita, and Botkit, to streamline and automate decision-making and information-sharing processes.

Try RingCentral's new collaborative communications experience, coming soon and available as a limited release starting April 14, 2017.
